revX™ PROPERTY

The only cloud-native SaaS solution

Take your department to the next level with RSI's revX™ Property: an unparalleled solution to provide timely tax-roll processing, assessment calculations, and billing to property owners right out of the box.

Upgrade your office's systems and support integrated **processing** with minimal disruption.

- Capture property tax and owner information, changes, and supplementals.
- Self-paced tax-roll review and acceptance processing.
- Generate accurate tax assessments and bills.
- Pre-built, configurable collection workflows.
- Real-time interfaces with other agencies.
- Own your data and have easy access to it for reporting and analysis.
- Allow employees to work effectively from any location – work, home or remote locations.
- Improve performance, and scale production during high-volume periods.
- Ingest appraisal and tax authority information to create the taxes, fees, and charges to bill against a property or person responsible for the liability.
- Easily build business rules associated with creating a receivable tied to a property or a person.
- Define, manage and bill Tax Increment Financing (TIF) and Business Improvement District (BID) fees, as needed.

Special Calculations Covered with revX™ Property :

Tax-increment financing zones, tax-reinvestment zones, special assessments, clean-energy calculations, and tax credits, among others, are all available for configuration to deliver accurate collection amounts.

World-Class Security with revX™

The Microsoft Azure Government Cloud is a Department of Defense (DoD) Impact Level 5 secure cloud with the most Compliance Authorization Certifications of any cloud provider.

revX™ is designed from its foundations on IRS Publication 1075 security controls. Get world-class security, FedRAMP protection, and compliance.

Apply advanced analytics and threat intelligence to detect attacks.

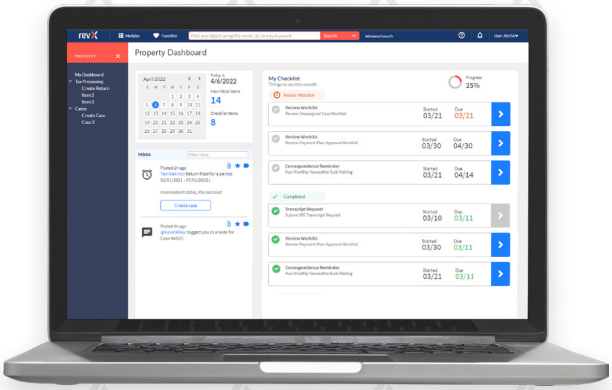
Use access and application controls to block malicious activity.

Find and fix vulnerabilities, before they can be exploited.

Simplify investigation when responding to threats.

Ensure compliance with security standards.

Respond to policy, regulatory, and tax law changes quickly without software engineers with logiX™



The core of **revX™** is **logiX™**, our business rules engine that enables users to make business rules and respond to policy, regulatory or tax law changes without coding.

Instead of writing, compiling, and deploying software code, **logiX™** allows you to use an editor to drag and drop fields to build and implement your own business rules.

Unify your data and automate your agency with the only platform capable of both automation and Low-Code/No-Code Configuration.

The Power of a Modern Platform Architecture for Government

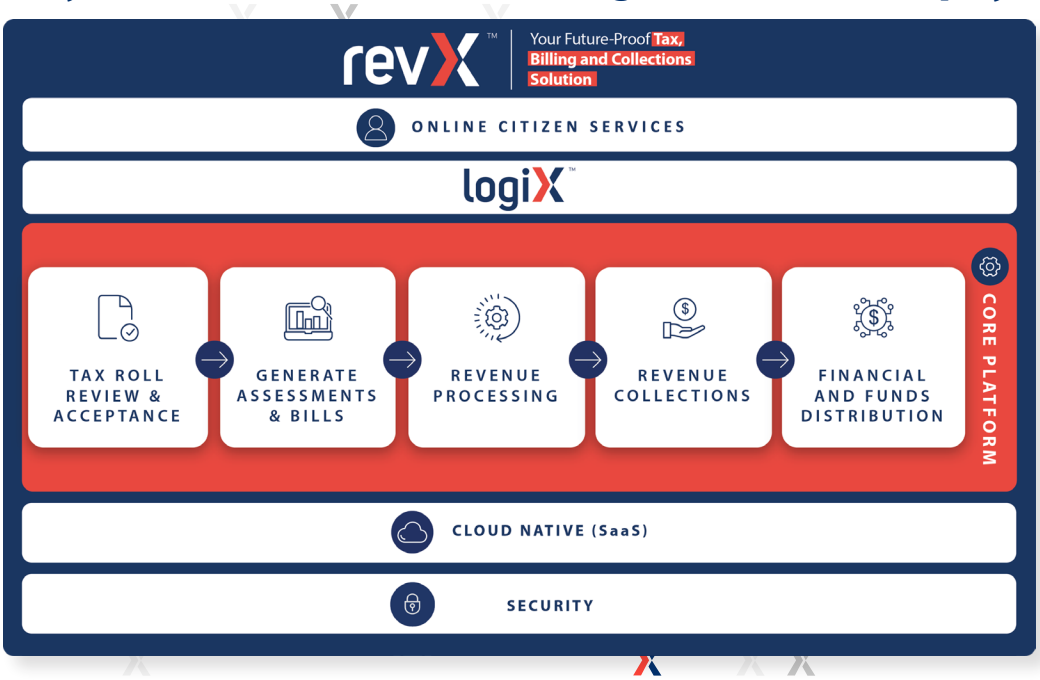
Microservices Architecture benefits the government in numerous ways, including faster updates to applications and citizen-facing services, without costly downtime.

Independently deployable and scalable enabling new features and functionality for your business. All with zero downtime.

Microservices provide a robust and resilient architecture with no single point of failure. Automatically scales based on your demand.

With revX™, governments are future-ready. When new technology that best suits the functionality within a service is available, it can quickly be deployed without impact on the surrounding ecosystem.

Give your Government a 360-degree view of Taxpayers



Release Your Potential - Today

Founded in 1996, RSI™ is the trusted, collaborative partner leading governments to innovation with the only cloud-native packaged software solution, revX™. Offered as Software as a Service (SaaS), revX™ is the preferred platform for government revenue processing. We empower public agencies and offices with solutions that improve citizen services; increase operational efficiency, collect additional revenue, and maximize compliance. For over 25 years, RSI™ has delivered transformative technology solutions across hundreds of client projects throughout the United States and Canada.
